

Wakim Solutions Group

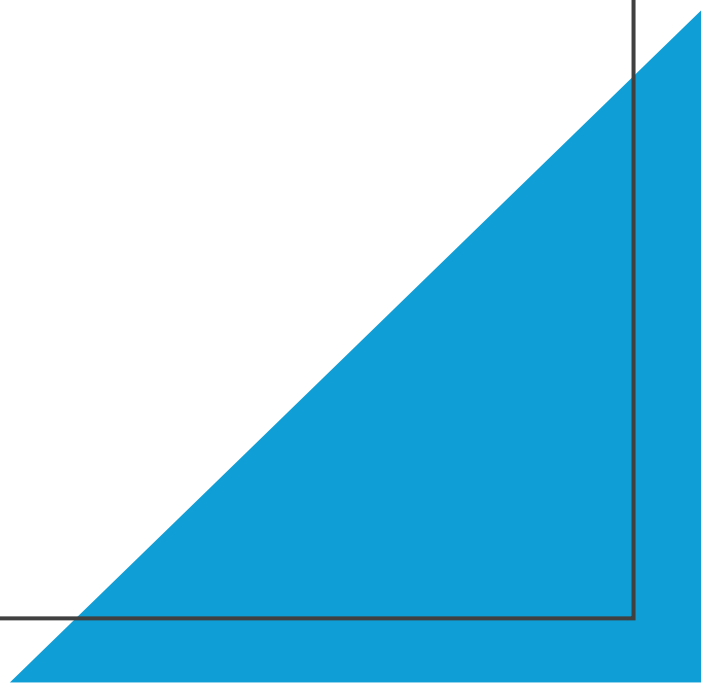

Intune Endpoint Management Mini-Lab

A Microsoft Intune lab simulating Windows endpoint enrollment, compliance policies, configuration profiles, app deployment, device sync, troubleshooting, ticket documentation, and knowledge base creation.

Created by: Roy Wakim

Tools: Microsoft Intune • Microsoft Entra ID • Windows 11 Pro • Microsoft 365 Business

Premium • osTicket • VMware Workstation Pro

Created a licensed Microsoft 365 test user for Windows endpoint enrollment and Intune device management testing.

Intune User added to active users

Intune User will now appear in your list of active users.

 Description

Windows 11 Pro endpoint VM for the Wakim Solutions Group Intune Endpoint Management Lab. This device will be enrolled into Microsoft Intune to test device management, compliance policies, configuration profiles, app deployment, and endpoint support workflows.

Verified that WAKIM-
ENDPT01 was
connected to the
Wakim Solutions Group
work account and
manually synced the
device with Microsoft
Intune.

Confirmed the Windows 11 endpoint name as WAKIM-ENDPT01 to identify it as the first Intune-managed device in the lab.

Verified that
WAKIM-ENDPT01
appeared in
Microsoft Intune as
an enrolled
Windows device.

Started creating a Windows configuration profile in Microsoft Intune using the Settings catalog.

Create a profile

Platform

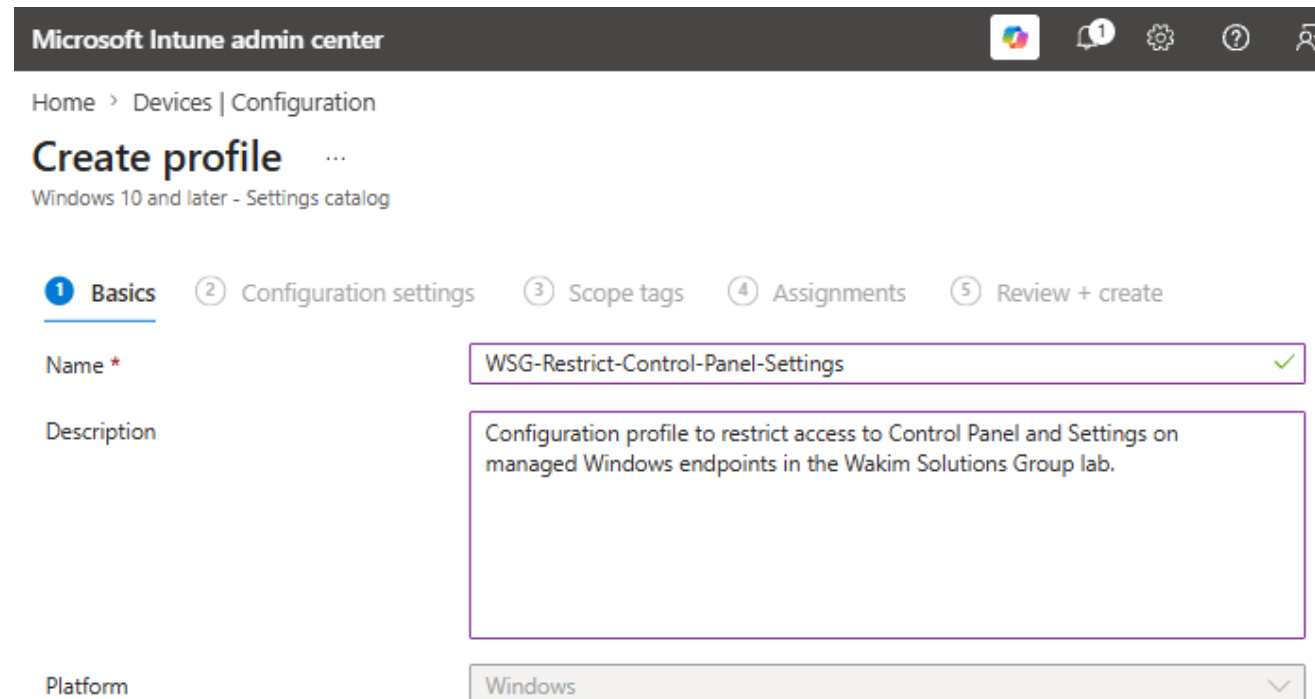

Windows 10 and later

Profile type

Settings catalog

Start from scratch and select settings you want from the library of available settings

Created a configuration profile to manage Windows endpoint restrictions through Microsoft Intune.

The screenshot shows the Microsoft Intune admin center interface. At the top, there's a dark header with the text "Microsoft Intune admin center" and several icons. Below the header, the breadcrumb "Home > Devices | Configuration" is visible. The main heading is "Create profile" with a three-dot menu icon. Underneath, it says "Windows 10 and later - Settings catalog". A progress bar at the top of the form has five steps: "1 Basics" (active), "2 Configuration settings", "3 Scope tags", "4 Assignments", and "5 Review + create". The form fields are: "Name *" with the value "WSG-Restrict-Control-Panel-Settings" and a green checkmark; "Description" with the text "Configuration profile to restrict access to Control Panel and Settings on managed Windows endpoints in the Wakim Solutions Group lab."; and "Platform" with a dropdown menu showing "Windows".

How to Enroll a Windows 11 Device into Microsoft Intune

Last Updated just now

Internal
[Manage Access](#)

Purpose:

This article documents the standard process for enrolling a Windows 11 device into Microsoft Intune.

Steps:

1. Confirm the device is Windows 11 Pro.
2. Confirm the user has a valid Microsoft 365 Business Premium license.
3. During setup, choose "Set up for work or school."
4. Sign in using the licensed work account.
5. Complete Windows setup.
6. Open Intune admin center.
7. Go to Devices > All devices.
8. Confirm the device appears in Intune.
9. Open the device details page and verify primary user, operating system, compliance status, and last check-in.
10. Document enrollment completion in the ticket.

Validation:

The device should appear in Intune as a managed Windows endpoint.

Tools:

Microsoft Intune admin center, Windows 11, Microsoft Entra ID, osTicket.

Created a knowledge base article for reviewing Windows device compliance status and documenting endpoint security results.
